The coupe and the moon

A cocktail bar lives at night, and the coupe is the glass that carries the night to the table: the crescent in the bowl says it in a single shape.

The coupe is the glass of the classics: wide, stemmed, served without ice and made to be held, not hurried. Under its rim sits the whole promise of the venue, a quiet room, a precise drink, and a moon that stays out until closing.

The symbol is reduced to the glass, the moon and one star. No spoons, no bubbles, no ornament: it stays legible at 16 px on a phone and engraved in brass on a door.

- **Nocturne** - the night is the whole setting
- **Craft** - classic technique, precise gestures
- **Discretion** - quiet, intimate, unhurried
- **Warmth** - brass and wine tones, never neon

Night and bone carry the venue; brass is the light, oxblood the glass of wine.

> **The best part of the evening is the one you did not plan.**

Horizontal lockup

This is the version to reach for first: website, email signature, flyers, contracts, clothing.

The symbol is twice as tall as the "NOIR 27" and always stays on its left, aligned to the optical centre of the text block. The descriptor *COCKTAIL BAR · MILANO* is exactly as wide as the wordmark: that coincidence is what holds the lockup together.

Wordmark typeface	Fraunces SemiBold, tracking +60
Descriptor	Fraunces SemiBold, tracking +260
Symbol/text distance	0.26 × symbol height
Lockup ratio	≈ 3.4 : 1
File	noir27-logo-horizontal.svg

The descriptor can be replaced with the full name or the city, keeping the weight, size and spacing given above.

The four forms of the mark

Horizontal

Primary use: web, print, documents.

Vertical

Narrow formats: totems, T-shirts, posters.

Symbol

When the name is already present: avatars, patterns, embroidery.

Monogram badge

App icon, seal, stamp, stickers.

Do not create new combinations: every variant is already balanced and must be used as it is, scaled proportionally.

Symbol geometry

The symbol is drawn on a square 16-unit grid and lives inside a circle: that is why it works well in all the circular social formats.

Canvas	256 × 256 units
Graphic footprint	152 × 152 units
Axis	the glass is symmetric on x = 128
Moon	one crescent, in negative
Star	four points, in negative

The moon and the star are **empty spaces**: the background colour shows through. This is why the mark stays intact even on photos, embroidery and engravings.

The symbol keeps the same clear space in a circle, in a square and on its own: these are the three allowed containers.

Clear space and minimum sizes

X = one quarter of the symbol height.

Leave at least X on all sides of the logo, free of text, images, borders and other logos. If you can afford more space, give it more: the mark breathes better.

VARIANT	PRINT	SCREEN
Horizontal logo	25 mm wide	140 px
Vertical logo	18 mm wide	100 px
Symbol only	8 mm tall	32 px
Badge / app icon	10 mm	40 px

Below these sizes always use the symbol alone: the wordmark and the descriptor would become illegible.

Ivory and white backgrounds

Bone #F3EEE4 - preferred

White #FFFFFF - allowed

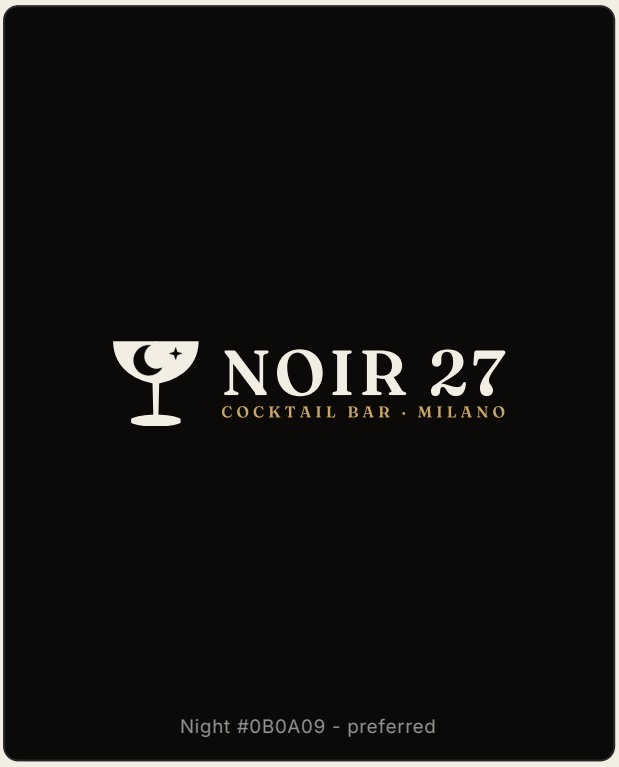

Light grey - allowed

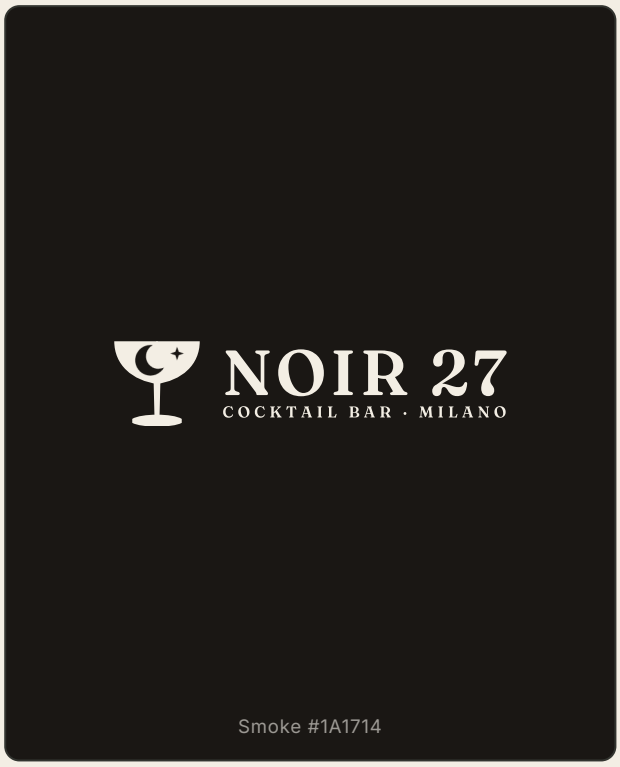

Symbol on Bone

On a light background the logo is always in solid Smoke. The accent colour is never used for text on a light background: the contrast (1.99:1) is not sufficient.

Dark background

Night #0B0A09 - preferred

Smoke #1A1714

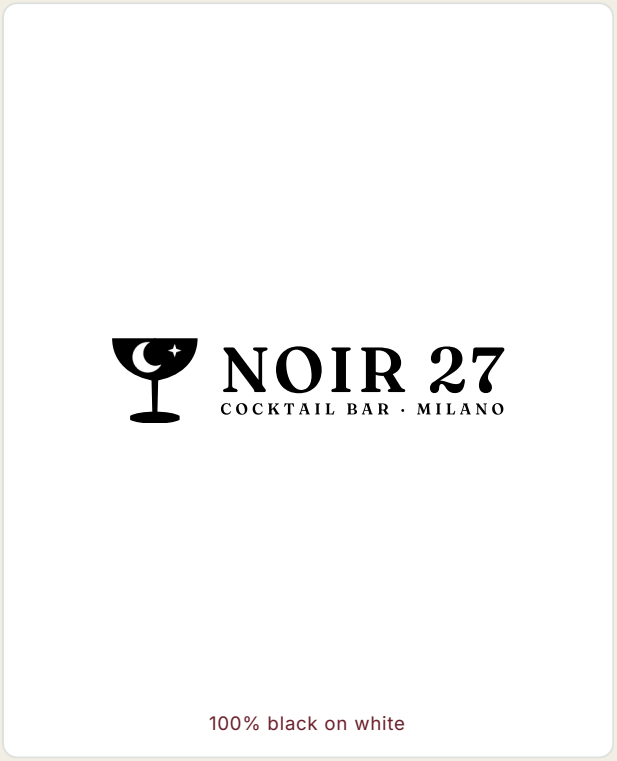

Vertical negative

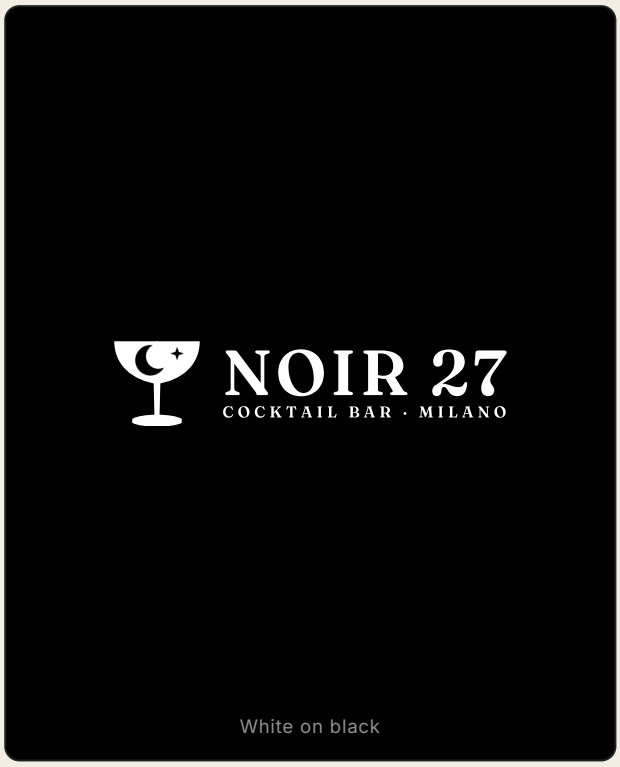

Symbol in Bone

On the dark background the descriptor can switch to Brass (contrast 8.61:1): it is the only context in which the accent touches the logo's typography.

A single colour

100% black on white

White on black

Black symbol - stamps, fax, engravings

White on accent

Use the monochrome version for one-colour screen printing, embroidery, laser engraving, stamps and black-and-white documents. The moon and the star stay empty: below 15 mm engraving or embroidery will close them, so enlarge the mark.

Palette

Smoke

HEX	#1A1714
RGB	26, 23, 20
CMYK	60, 50, 50, 90

Primary colour. Symbol and text on light surfaces.

Night

HEX	#0B0A09
RGB	11, 10, 9
CMYK	55, 45, 45, 100

Default background, covers, signage and menus.

Brass

HEX	#C9A668
RGB	201, 166, 104
CMYK	22, 34, 65, 6

Brass: the light of the venue. Max 10% of the surface.

Bone

HEX	#F3EEE4
RGB	243, 238, 228
CMYK	3, 4, 9, 0

Text on dark and default light background (never pure white).

Oxblood

HEX	#6B1F2A
RGB	107, 31, 42
CMYK	35, 95, 75, 45

Secondary colour for details, lines and captions.

Recommended proportions

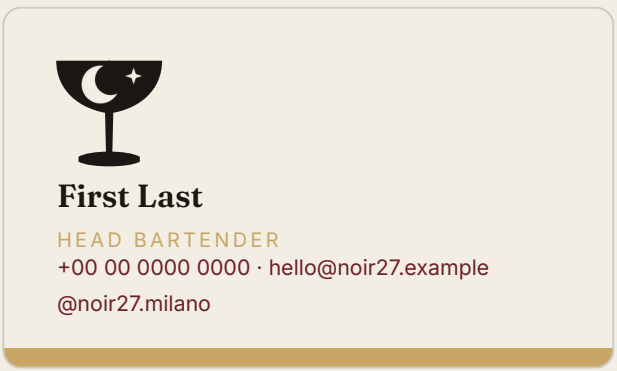

The accent is a spark, not a surface: buttons, details, numbers, underlines.

Contrasts (WCAG)

Incorrect uses

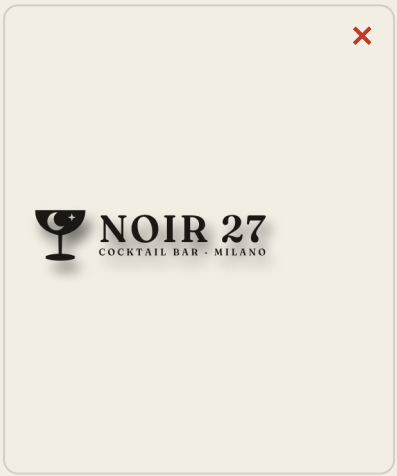

Do not stretch or squash

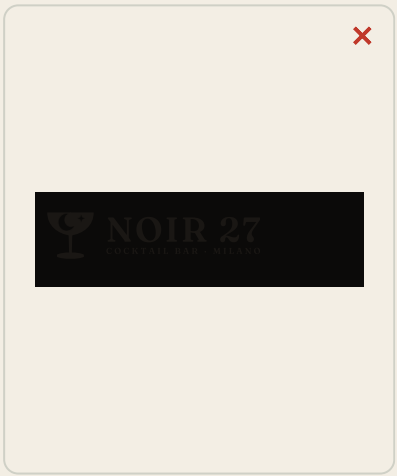

Do not rotate the mark

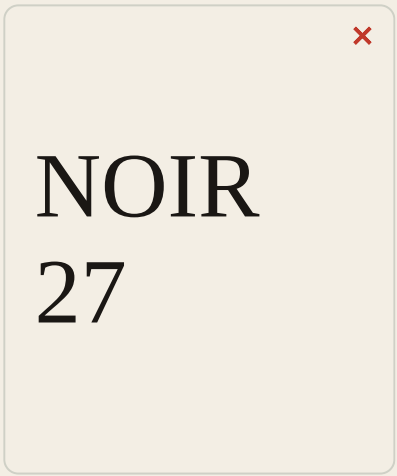

Do not change the colours

Do not add shadows or outlines

Do not use the primary colour on dark backgrounds

Do not retype the wordmark in other fonts

When in doubt: take the correct SVG file, scale it proportionally and don't touch anything else.

Technical notes

- Apple icons must **not** have rounded corners or transparency: iOS applies the mask itself. The files provided already have a solid background.
- 120, 152, 167 and 180 px (iPhone, iPad, iPad Pro) are included, plus 1024 px for the App Store.
- *icon-maskable-512* has the 28% margin Android requires for adaptive icons.
- *og-image-1200×630* is the preview for WhatsApp, Facebook and LinkedIn.
- Use the SVG logo on the site: it stays sharp on every screen and weighs a few KB.

The files and when to use them

Once the variant is chosen, the package is delivered with this structure.

logo/svg/*.svg	Vector, primary use everywhere (web, print, typesetting)
logo/png/*.png	High-resolution raster with transparent background
***-negative**	For dark backgrounds (mark in light colour)
***-mono-black / -mono-white**	Single colour: stamps, embroidery, screen printing
web/favicon.ico + png	Browser tab icon
web/apple-touch-icon*.png	Icon for iPhone/iPad and the App Store
web/icon-192 / 512 / maskable	Installation as an app (PWA, Android)
web/safari-pinned-tab.svg	Monochrome icon for Safari
web/og-image-1200x630.png	Preview in shared links
web/avatar-social-1024.png	Profile picture for Instagram, Facebook, WhatsApp
web/site.webmanifest	Manifest already filled in with the brand colours
web/head-snippet.html	Lines to paste into the site

A mark works when it is always repeated the same way.
Start from these files, don't redraw them.
