BASED IN
Arona, Italy

SKILLS

Cloud

- AWS (advanced)
- Serverless, Networking, Security, IAM
- AWS migrations and assessments
- EC2 Image Builder, Monitoring
- Microsoft Entra, Azure, Firebase (foundational)

Development

- JavaScript, TypeScript
- Node.js, Vue.js, Nuxt, OCLIF
- Python, Bash
- Microservices, REST APIs
- SQL and NoSQL databases
- HTML, CSS, UI/UX
- Visual Basic, Go, Prolog, Lisp (basic)

DevOps

- Terraform, OpenTofu, Terragrunt
- AWS CLI, Git, GitHub
- AWS CodePipeline, GitHub Actions, CI/CD
- Azure DevOps, Docker

AI

- Claude, Claude Code
- MCP, connectors, skills, subagents, hooks
- Agentic coding
- AI-assisted software development

Tools

- Linux, SSH, VS Code
- Google Workspace, Apps Script

Samuel Sulo

CLOUD ENGINEER & WEB DEVELOPER

ABOUT

I design and build solid cloud infrastructure and modern web products. I work on AWS architecture, migrations and serverless platforms, and build web applications with Vue.js and TypeScript. I take projects from analysis and design to release and operations, and I enjoy solving problems end to end. I also build with AI tools such as Claude Code, using agentic workflows and custom skills.

EXPERIENCE

Cloud Engineer

06/2026 - Present

Corley · Turin, Italy

- Worked on an e-learning platform based on Moodle, owning the project end to end: customer management, analysis, design, implementation and testing.
- Built the platform's infrastructure and its releases, including the golden AMI pipeline with EC2 Image Builder.
- Ran AWS assessments and Migration Acceleration Program (MAP) engagements for several customers: discovery of their environments on other cloud providers or on premises, inventory and metrics collection, and migration proposals to AWS (lift and shift, replatform, optimized) with cost estimates and migration waves.

Cloud Developer

02/2023 - 06/2026

S2E: Solutions to Enterprise · Milan, Italy

Software development in the Cloud Security Team, integrating cloud technologies and security practices. I independently managed:

- Refactoring of a welfare service after a data breach: data partitioning and isolation, application code, authorization policies, the migration from Amplify to Terraform and release automation with AWS CodePipeline.
- A multi-tenant security assessment platform on AWS serverless services: a SaaS portal for clients, an admin portal for tenants and users, and the backend services for authentication, authorization and management.
- A data synchronization solution on AWS serverless services that automates the synchronization of two asset inventories.
- A training course on Amazon API Gateway for 15 to 20 participants, with slides, interactive demos and real-world use cases.
- Sumo Logic parsers and log mapping for security monitoring, and Visual Basic scripts for identity management workflows on the One Identity platform.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate
credly.com/badges/b7b6a4ec-487e-4831-9bb3-6bdbd4a1ef1f

AWS Certified Developer - Associate (expired)
credly.com/badges/bbc75401-dc9f-4ecb-ac0b-988c8e6f13b6

AWS Certified Cloud Practitioner

EXPERIENCE

Cloud Developer
08/2021 - 02/2023

Storm Reply · Turin, Italy

Member of the cloud migration team.

- Led the design and implementation of a single sign-on platform for multiple applications, from the production release through its maintenance.
- Developed an order management system: backend services and web applications for order processing and tracking.
- Contributed to a satellite-based tolling system, implementing geofencing and toll calculation.

SELECTED PROJECTS

Bar I.D.E.A. CLIENT
ideagelateria.com

Visual identity, printed materials, website and AWS infrastructure for a cafe, gelato and pastry shop. Production runs in the client's own AWS account, managed with OpenTofu and Terragrunt.

NOIR 27 DEMO
noir27.samuelsulo.it

Website and brand of a fictional cocktail bar: logo, business card, review materials, menu, events, reviews and a reservation flow.

Nexus DEMO
nexus.samuelsulo.it

E-commerce web application for gaming peripherals, built with Vue.js, TypeScript and Pinia.

PULSE DEMO
pulse.samuelsulo.it

Project and team management workspace: a dashboard with projects, tasks, team directory, analytics and an activity feed.

EDUCATION

Computer Science
2020 - 2023

University of Milan Bicocca · Milan, Italy

- Operating systems, networking, software engineering, imperative and declarative programming.
- Projects: an Android app for subscription management, a JSON parser library in Prolog and Common Lisp, a backend service with a custom Redis implementation in Java, and a relational database in MySQL.

Information Technology and Telecommunication
2015 - 2020

Leonardo da Vinci High School · Borgomanero, Italy

- Programming in Java and C++, operating systems, distributed systems and SQL databases.
- Web development with HTML, CSS and JavaScript, through frontend and backend projects.
